

Jornada Técnica sobre CIE-10

Introducción Conceptual | **Conceptual Briefing**

15-16 de septiembre de 2009
Escuela Nacional de Sanidad

Datos de contacto | Contact data

- Arturo Romero Gutiérrez
- Médico de Admisión y Documentación Clínica
- Complejo Hospitalario de Toledo
- Miembro de la Unidad Técnica de la CIE-9-MC para el Sistema Nacional de Salud
- aromero@sescam.org

Hechos clave | Key facts

- Desarrollo ICD-10-CM y PCS | Development
 - Proceso largo | Long time in process
 - Respuesta crítica de proveedores | Provider criticism
 - Apoyo moderado de AHIMA* | Moderate support
 - Estado borrador | Draft status
 - Efecto “poda” | Pruning effect
 - Plazo en EE.UU. 1 oct 2013 | Deadline in USA
 - Sistemas de mapeo | Mapping systems
 - “Complejidad” de PCS | PCS “complexity”
- Agotamiento de CIE-9-MC | Run off codes
- Terminología pobre | Poor terminology
- Taxonomía anticuada | Obsolete taxonomy

* AHIMA: American Health Information Management Association

Versiones | Versions

- CIE-9-MC 2008 (ICD-9-CM FY2007)
- CIE-10 (2003, 2008)
- ICD-10-CM Clinical Modification (2009)
- ICD-10-CA Canada Enhancements
- ICD-10-AM Australian Modification
- PCS Procedure Coding System (2009)
- Other procedure classifications

Actividades | Activities

- Mantenimiento continuado de CIE-9-MC
| Continued CIE-9-MC updating
- Observación de limitaciones CIE-9-MC
| Observing limitations
- Seguimiento de publicaciones ICD-10 (+CM)
| Publications monitoring & follow-up
- Diseño de eCIE10 y sistema de mapeo
| Web application design + mapping system
- Ensayo de prototipos eCIE10MC & PCS
| Prototype testing

International Classification of Diseases, Tenth Revision, Clinical Modification (ICD-10-CM), 2009 Update*

**Note: This update replaces the July 2007 release.*

These files linked below are the 2009 update of the ICD-10-CM. Content changes to the Tabular and to the General Equivalence Mapping Files are described in separate files that are included along with the main files compressed in zip format. The index has not had content changes.

These files have been created by the National Center for Health Statistics (NCHS), under authorization by the World Health Organization. See [About ICD-10-CM](#) for more details on the development of the ICD-10-CM.

Although this release of ICD-10-CM is now available for public viewing, the codes in ICD-10-CM are not currently valid for any purpose or use. There is now an anticipated implementation date for the ICD-10-CM of October 1, 2013. Updates to this draft are anticipated prior to implementation of ICD-10-CM.

No comments are being sought on the content of ICD-10-CM. Any

ICD-10-CM 2009

The screenshot shows a Mozilla Firefox browser window displaying the CMS website. The address bar shows the URL: http://www.cms.hhs.gov/ICD10/02m_2009_ICD_10_CM.asp. The page header includes the HHS.gov logo and the tagline "Improving the health, safety and well-being of America". The main navigation bar features the CMS logo and the text "Centers for Medicare & Medicaid Services", along with a search box and a "Search" button. Below the navigation bar, there are several menu items: Home, Medicare, Medicaid, CHIP, About CMS, Regulations & Guidance, Research, Statistics, Data & Systems, Outreach & Education, and Tools. A secondary navigation bar includes links for People with Medicare & Medicaid, Questions, Careers, Newsroom, Contact CMS, Acronyms, Help, Email, and Print. The main content area is titled "2009 ICD-10-CM" and contains a left sidebar with a navigation menu and a main content area with a description, download links, and related links. The left sidebar menu includes: Overview, 2009 ICD-10-PCS, 2008 ICD-10-PCS, 2009 ICD-10-CM (highlighted), 2008 ICD-10-CM, Statute/Regulations/Program Instructions, Educational Resources, Announcements and Communications, 2009 CMS Sponsored Calls, 2008 CMS Sponsored Calls, and ICD-9-CM Coordination and Maintenance Committee Meetings. The main content area includes: "2009 ICD-10-CM" heading, a paragraph explaining the new diagnosis coding system, a "Downloads" section with links for "2009 Version - What's New [PDF, 14KB]", "2009 Diagnosis Code Set General Equivalence Mappings [ZIP 1.1MB]", "2009 Reimbursement Mapping Guide [PDF 56KB]", "2009 Reimbursement Mappings - Diagnoses [ZIP, 189KB]", "2009 ICD-10-CM Index to Diseases & Injuries [ZIP, 6MB]", and "2009 ICD-10-CM Tabular List of Diseases & Injuries [ZIP, 3MB]"; a "Related Links Inside CMS" section stating "There are no Related Links Inside CMS"; a "Related Links Outside CMS" section with a globe icon and stating "There are no Related Links Outside CMS"; and a footer with "Page Last Modified: 06/22/2009 9:05:08 AM", a link to "Help with File Formats and Plug-Ins", and a "Submit Feedback" link. The browser status bar at the bottom shows "Terminado".

NCCH Executive Committee

The NCCH executive committee guides the business operations of the NCCH.

Terms of reference

1. To oversee the function of the National Centre for Classification in Health
2. To report to and from represented organisations, including seeking agreement and implementation where appropriate
3. To receive and approve the budget on an annual basis
4. To receive twice-yearly reports from the director on the financial status of the Centre
5. To receive and approve the work plan on an annual basis
6. To receive progress reports from the director on the work of the Centre in relation to the agreed work plan
7. To guide the Centre in achieving its goals as set out in the agreed work plan
8. To establish policies for the Centre
9. To review and advise on submissions from the Centre for funding
10. To approve changes to scope of the Centre.

ICD-10-CA

On this page: [Scope](#) | [Benefits](#) | [Coding Structure](#) | [Support](#) | [Public Submission Process](#) | [Contact](#)

The International Statistical Classification of Diseases and Related Health Problems, 10th Revision (ICD-10) is an international standard for reporting clinical diagnoses developed by the World Health Organization. [More Benefits.](#)

ICD-10-CA is an enhanced version of ICD-10 developed by CIHI for morbidity classification in Canada. See [the Canadian Enhancement to ICD-10](#) (PDF) 811 KB Statistics Canada is responsible for the mortality applications of ICD-10 as produced by WHO. The companion classification to ICD-10-CA for coding procedures in Canada is CCI. ICD-10-CA replaces ICD-9 and ICD-9-CM in Canada. See [implementation status.](#)

Scope

ICD-10-CA classifies diseases, injuries and causes of death, as well as external causes of injury and poisoning. The classification has [23 chapters](#) with alpha-numeric categories and subcategories. Unlike ICD-9, ICD-10-CA applies beyond acute hospital care. ICD-10-CA also includes conditions and situations that are not diseases but represent risk factors to health, such as occupational and environmental factors, lifestyle and psycho-social circumstances.

Benefits of new version

ICD-10-CA represents the broadest scope of any previous ICD revision to date. ICD-10-CA is more comprehensive and specific than current standards and extends well beyond the traditional causes of death and hospital admission. ICD-10-CA is also more adaptable than previous versions, allowing for the addition of codes as new diseases are discovered. Both CIHI and Statistics Canada are represented on the Update and Revision Committee, a sub-committee of the WHO Family of International Classifications. Canada fully participates in the updating process with input into the decisions for both mortality and morbidity data

The Implementation of ICD-10-CA and CCI in Canada

Lori Moskal, CCHRA (c)

Introduction

The Canadian implementation of *The International Statistical Classification of Diseases and Related Health Problems, Tenth Revision, Canada* (ICD-10-CA) and *The Canadian Classification of Health Interventions* (CCI) began in 2001 with five provinces and one territory. In 2002, Canada's two most populated provinces moved to adopt the new classifications, and it is anticipated that by 2006, all 10 provinces and 3 territories will have adopted the new classifications. As Canada is a bilingual country, ICD-10-CA and CCI are produced in both official languages, English and French.

Background

Since 1979, a variety of medical classification standards have been used to collect national and provincial statistics on death, illness, surgical procedures, and treatments. More recently, the two classification standards in use were ICD-9, with its companion surgical classification *The Canadian Classification of Diagnostic, Therapeutic and Surgical Procedures* (CCP) and ICD-9-CM. In December 1995, the Conference of Deputy Ministers of Health and Chief Statistician of Canada approved the recommendations to adopt the newly published *International Statistical Classification of Diseases and Health Related Problems-Tenth Revision* (ICD-10) and a revised or new CCP. For the purposes of morbidity data collection, Canada produced a clinical modification to ICD-10 the ICD-10-CA and a new classification tool for interventions the CCI.

Methods

The education program is composed of four modules. It was designed to deliver as much information as possible with a minimal disruption to work priorities. The provinces did not want their coders to be away from their desks for more than two days, considering that a backlog already existed in many sites. The four modules are:

- Self-learning package that contains a comparison of ICD-9 and ICD-9-CM to ICD-10-CA; explanation of the generic structure and concepts used in CCI; and a brief introduction to using electronic reference material. The new classifications are distributed in electronic format only.
- Two-day workshop that takes place in a computer lab where each participant

The screenshot shows a MySQL database management tool interface. The main window displays a table with 32 rows of data. The table columns include: id, idpadre, idroot, nodo_final, orden, tab, cap, sec, subsec, cat, nivel, elem, tipo, grupo, clase, lista_aux, anyo, cod_nuevo, cod_modif, desc_id, descripcion, and descri. The data represents ICD-9-MC codes and their corresponding descriptions, such as 'CLASIFICACION DE ENFERMEDADES Y LESIONES' and '1. ENFERMEDADES INFECCIOSAS Y PARASITARIAS (001-009)'. The interface also shows a query editor at the bottom with SQL commands for table information and a status bar at the very bottom indicating 'autocoderdb: 38 table(s)', 'Connected: 00:00:42', 'MySQL 5.0.51', 'Uptime: 122 days, 05:06:34', and 'Ready.'

E00 Trastornos de la glándula tiroides (E00-E07)
E00 Síndrome congénito de deficiencia de yodo
Incluye: afecciones endémicas asociadas directamente con deficiencia de yodo en el medio ambiente o como consecuencia de deficiencia materna de yodo. Algunas de estas afecciones no tienen hipotiroidismo concomitante pero son consecuencia de secreción inadecuada de hormona tiroidea durante el desarrollo fetal. Pueden asociarse bociógenos ambientales.
Use código adicional (F70-F79), si desea identificar la asociación con retraso mental.
Excluye: hipotiroidismo subclínico por deficiencia de yodo (E02)

- **E00.0** Síndrome congénito de deficiencia de yodo, tipo neurológico
Cretinismo endémico, tipo neurológico
- **E00.1** Síndrome de deficiencia congénita de yodo, tipo mixedematoso
Cretinismo endémico:
 - . hipotiroidismo
 - . tipo mixedematoso
- **E00.2** Síndrome congénito de deficiencia de yodo, tipo mixto
Cretinismo endémico, tipo mixto
- **E00.9** Síndrome congénito de deficiencia de yodo, no especificado
Cretinismo endémico SAI
Hipotiroidismo por deficiencia congénita de yodo SAI

E01 Trastornos tiroideos vinculados a deficiencia de yodo y afecciones relacionadas
Excluye:
- hipotiroidismo subclínico por deficiencia de yodo (E02)
- síndrome congénito de deficiencia de yodo (E00.-)

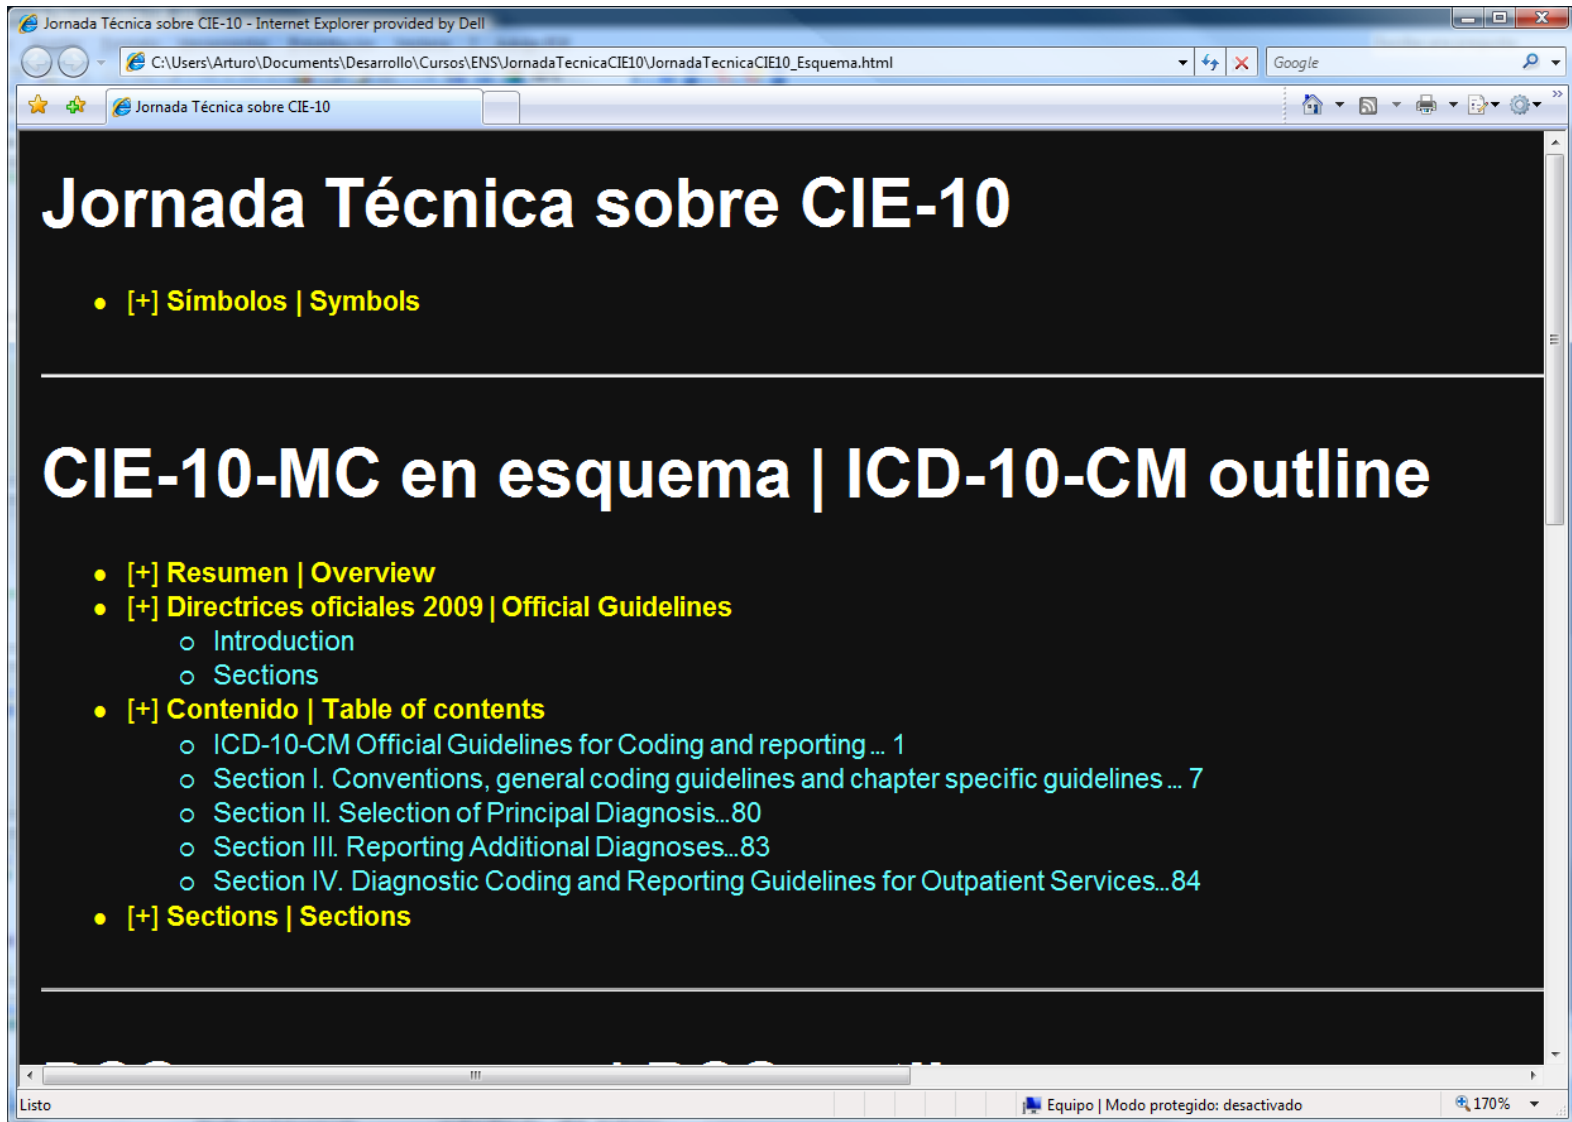

- **E01.0** Bocio difuso (endémico) relacionado con deficiencia de yodo
- **E01.1** Bocio multinodular (endémico) relacionado con deficiencia de yodo
Bocio nodular relacionado con deficiencia de yodo
- **E01.2** Bocio (endémico) relacionado con deficiencia de yodo, no especificado
Bocio endémico SAI
- **E01.8** Otros trastornos de la tiroides relacionados con deficiencia de yodo y afecciones similares
Hipotiroidismo adquirido por deficiencia de yodo SAI

E02 Hipotiroidismo subclínico por deficiencia de yodo

WebSCAn PCS Help

The Procedure Classification System (PCS) is a multiaxial classification and coding system for medical procedures. Its development has been performed over several years in order to overcome the limitations of previous procedure classifications, especially ICD-9-CM.

In PCS, procedures are coded with seven alphanumeric characters. Each position holds information about one particular axis of classification.

1. Section
2. System
3. Operation
4. Body part
5. Approach
6. Device
7. Qualifier

Operations are identified and described according to standard PCS definitions (see [Glossary](#))

Valid PCS codes are available for more than 175.000 procedures. The complexity of the classification and the number of options makes advisable to use specialized browsers able to explore efficiently all the details and resources of terminology and classifications. Mapping resources from and to ICD-9-CM make possible to validate sets of codes according to the indexing criteria of this classification. The addition of user-enhanced terminology index may improve consistency among coders and make the process of coding more efficient and less tiring.

Respuesta a críticas | Answering Criticism

- Ulceras por presión y localizaciones anatómicas
 - Pressure ulcers are a common condition in elderly Medicare beneficiaries with chronic illnesses. Under the current ICD-9-CM system, health care practitioners can identify the severity or location of a pressure ulcer but the coding system cannot link those elements if the patient has more than one ulcer. Under a single ICD-10 code, a patient's medical history will identify the severity and location of each pressure ulcer;
- Angioplastia y procedimientos en general
 - ICD-9 has only one code for angioplasty, the widely used procedure for widening a narrowed or obstructed blood vessel. ICD-10 provides 1,170 coded descriptions, with a granularity that pinpoints the location of the blockage and the device used for each patient;
- Lateralidad
 - ICD-9 codes do not provide sufficient detail to distinguish whether a condition occurred on a patient's left or right side. ICD-10 will improve care by providing that basic type of information;
- Códigos de combinación
 - ICD-9 includes separate codes for medication errors and other external causes of injury, which are reported separately from the actual condition. Under ICD-10, information about medication errors and external causes of injury will be embedded in the code for the condition. Therefore a single, more informative code will provide a ready source of information to help medical professionals prevent medical errors and improve quality of care."
